Press Release – July 8, 2025

E-Mobility: Energie 360° Acquires Move Mobility, Strengthens Leading Position in Switzerland

Effective immediately, Energie 360° has acquired charging provider Move Mobility. This merger strengthens the position of Energie 360°'s mobility group as a leader in Swiss e-mobility. The group, which includes the brands Energie 360°, Gofast, Swisscharge, and Move Mobility, will now offer over 24,000 public and private charging points across all Swiss regions and serve 250,000 users. Starting November 1, 2025, all roaming fees within the Energie 360° mobility group's charging network will be eliminated.

As Switzerland's leading mobility group, Energie 360° is solidifying its position as number one in the EV charging market. With the acquisition of Move Mobility from Primeo Energie and Groupe E, the number of charging points increases by 4,700 to over 24,000 total. The user base grows by 50,000 to more than 250,000. Energie 360° is fully integrating Move Mobility and its employees into its mobility group, while keeping the brand identity, as it does with its other brands. The company also gains permits from the Federal Roads Office (FEDRO) to build and operate charging hubs at around 40 highway rest stops.

Reto Baschera, Head of Energie 360°'s Mobility Group, says: "We're excited to accelerate e-mobility across Switzerland with our brands Energie 360°, Gofast, Swisscharge, and Move Mobility as the number one charging infrastructure provider."

Jörg Wild, CEO of Energie 360°, emphasizes: "By integrating Move Mobility, we retain value creation in Switzerland, expand our expertise, and reinforce our presence across all regions."

Daniel Neuhaus, CEO of Move Mobility, adds: "With Energie 360°, we gain a strong owner that perfectly complements our roots in Western Switzerland. Together we offer a unique nationwide e-mobility experience, leverage synergies, and tailor our services to customers' needs."

Both Groupe E and Primeo Energie, the former owners of Move Mobility, are confident Energie 360° is the ideal partner.

Cédric Christmann, CEO of Primeo Energie, says: "Energie 360° enables Move to grow efficiently in a dynamic market and respond even better to customer needs."

Alain Sapin, interim CEO of Groupe E, adds: "By selling, Groupe E can now focus on delivering full energy solutions for private and business clients – reinforcing our long-term commitment to sustainable mobility."

Fast Expansion of EV Charging Network Across Switzerland

With this strategic move, Energie 360° positions itself as a driving force in the transition to electric mobility. The merger gives it the most extensive public and private charging network in all Swiss regions. Real estate investors, companies, and fleet operators will benefit from a full-service offering – from planning to operation. The company plans to invest CHF 200 million by 2030 to expand its charging network.

Customer Benefits Across Switzerland

The merger brings clear benefits for Swiss EV drivers and businesses:

– More charging stations across Switzerland – shorter distances to your next charge.

– No roaming fees within the Energie 360° mobility group's charging network as of November 1, 2025.

– More mobility experts available, especially in Western Switzerland.

– Enhanced IT and tech know-how for stronger customer focus – especially for companies and fleets.

About Energie 360°

Energie 360° brings sustainable energy to all of Switzerland. Around 400 employees work together with customers, partners, and municipalities to promote renewable energy and ecological mobility. Based in Zurich and Lausanne, the company designs, builds, and operates energy solutions and leads in biogas, solar installations, and wood pellets. Together with Swisscharge, Gofast, and Move, Energie 360° forms Switzerland's leading e-mobility group. Every day, Energie 360° helps advance the net-zero goal – right here, right now, for future generations.

About Swisscharge

Swisscharge offers Switzerland's most popular charging app and most reliable charging network. With about 50 employees and interdisciplinary expertise, it develops smart charging solutions. As a system integrator and enabler, it provides the data infrastructure and full support in German, French, Italian, and English – for the best charging experience and a "Greener Tomorrow."

About Gofast

Gofast is a Swiss company building and operating the most extensive national fast-charging network for EVs. Today, around 90 fast-charging sites are in operation along key highways and transport hubs. In the coming years, the network will expand to over 200 locations across Switzerland. A 10-minute charge at a Gofast station can deliver up to 200 kilometers of range. All electricity comes from 100% renewable Swiss sources.

About Move Mobility

Move Mobility is a Swiss provider of charging and billing solutions with a strong foothold in Western Switzerland. Founded in 2017 and based in Granges-Paccot, Move stands for "Mobilité Véhicule Electrique." With 16 employees, Move operates public charging stations, bills private charging points for companies and fleets, and supports users registered on its own charging network.
