

# MOVE network

**Enhance the appeal and added value of your location, and optimise the capacity of your infrastructure.**

The number of electric car drivers is rising steadily and consistently, and with this the demand for charging stations. These are preferably within easy reach and ideally should provide an incentive to make good use of the wait time.

You too can enhance the appeal of your business or location and create a positive customer experience by making the frequently complicated charging process more straightforward and enjoyable for drivers of electric vehicles. Integrate your charging station into the MOVE network – one of the best smart public charging networks in Switzerland. MOVE offers its thousands of customers and all other electric vehicle drivers in Switzerland a vast number of MOVE charging options as well as access to many more. These are complemented by countless charging options across all of Europe, and together with your location, the network is set to grow!

Alongside an expanded product range and more appeal for the steadily growing and affluent segment of electric vehicle drivers, you can enjoy a number of extra benefits

- In bringing you on board as a partner on [www.move.ch](http://www.move.ch), we strengthen your positioning, market your location and attract new customers.
- The charging stations bring additional users and thus more revenue (with a reimbursement from us).
- Thanks to a range of payment options, the charging stations are available to every electric vehicle driver – no need to be a MOVE member.
- Position your brand by fitting out the charging stations in your own corporate design.
- Thanks to remote monitoring and maintenance, your charging station will always meet the highest requirements for reliability.
- Our professional MOVE customer hotline offers you 24/7 support.
- Thanks to per-minute billing, MOVE guarantees the optimal utilisation of the charging infrastructure

The installation of a new charging station is greatly dependent on the respective location. Our business experts will be happy to advise you personally on any other questions you may have about the necessary investments, on-site prerequisites, infrastructures, maintenance and more. Please contact us any time on **026 322 34 01** (Stéphane Rosset, Partner Manager) or via email at [sales@move.ch](mailto:sales@move.ch).

**We look forward to hearing from you.**
